Projects/Recent Works

<https://github.com/Owen150>

Location

Nairobi, Kenya

INTERESTS

Front-end Software Development
Full-stack Software Development
Machine Learning
Data Science
Artificial Intelligence
Computer Graphics
Game Development

EDUCATION

Bachelor of Science in Informatics and Computer Science (BICS) Strathmore University

Karen Ole Sangale Rd, Madaraka Estate

Nairobi, Kenya

2019 – 2024

Relevant coursework:

1. Data Structures & Algorithms.
2. Database Systems.
3. Programming.
4. Information System Security & Design.
5. Software Development Lifecycle.
6. Machine Learning & AI.

Mean Grade: 2nd Class

Kenya Certificate of Secondary Education (KCSE)

Nairobi School

Waiyaki Way, Westlands Area

Nairobi, Kenya

2013 – 2016

Mean Grade: A– 76 Points

Kenya Certificate of Primary Education (KCPE)

Kaimosi Friends Primary School

Kaimosi, Vihiga County

2010 – 2012

Mean Grade: A– 75.4 Points .i.e. 377/500 Marks

HOBBIES

Coding/Development
Gaming
Drawing & Painting
Football

TOOLS & TECHNOLOGIES

AngularJS
Angular Material
NodeJS
Spring Boot
Bootstrap
Postman
NPM
Git
Laravel

PROJECTS

Angular E-commerce Retail Shop
Project

A Distributed Denial of Service (DDoS)
Botnet Attack Detection and
Classification System Using Random
Forest Algorithm – Jupyter Notebooks,
Python, Django - Final Year ICS ML
Project.

Hospital Electronic Records
Management System – Laravel PHP

Food Recipes Application –
Android/Kotlin

Medicine Inventory Management
System – Laravel/PHP

VLCng – VLC Next Generation
Audio/Video player using NextJS –
Collaborative JavaScript Project – ICS
Year 3

School Transport Route Management
System – Laravel/PHP

CERTIFICATIONS

CCNAv7: Switching, Routing, and Wireless Essentials, CISCO Strathmore University

Nairobi, Kenya

Skills Gained:

1. Switching Fundamentals – Switch operation, Switch Configuration, MAC address table management.
2. Routing Essentials – IPv4 and IPv6 addressing, Static routing, Dynamic routing.
3. Wireless LAN Fundamentals – Basic Wireless troubleshooting.
4. Network Security Basics – Port security, Secure management access.

Completed on: 18 March 2021

Grade: Merit

CCNA R&S: Introduction to Networks, CISCO Strathmore University

Nairobi, Kenya

Skills Gained:

1. Networking Fundamentals – Types of Networks, Network components, Network topologies, Network Models.
2. Ethernet & Switching Basics – MAC addresses, Switching logic, Basic switch setup.
3. IP Addressing Fundamentals – Assigning IP addresses.
4. Network Layer & Routing Basics – Role of the router, Routing process.

Completed on: 04 December 2019

Grade: Merit

IT ESSENTIALS: PC Hardware and Software, CISCO Strathmore University

Nairobi, Kenya

Skills Gained:

1. Introduction to the PC – Computer Components, I/O Devices, Internal connectors, Computer assembly basics.
2. Operating Systems – Windows installation & setup, Linux basics, File systems, User accounts & permissions.
3. Computer Assembly & Disassembly – BIOS/UEFI setup, Upgrades, Preventive maintenance.
4. Security Essentials – Threat types, Antivirus & Malware tools, User best practices, Physical security.
5. Troubleshooting Skills – Hardware issues, Software issues, Networking issues.

Completed on: 05 August 2019

Grade: Merit

TECHNICAL SKILLS

1. **Programming Languages:** Java, Python, JavaScript, php, C#, Bootstrap, CSS, HTML, JSON, AJAX, TypeScript, Kotlin.
2. **Frameworks & Libraries:** Angular, React, Node.js, Spring Boot, Laravel, Django.
3. **Databases:** MySQL, PostgreSQL.
4. **Tools & Platforms:** Git, Docker, Android Studio, NetBeans, Jupyter Notebooks.
5. **Languages:** English, Kiswahili, French Level I & II.
6. **Other Skills:** REST API Development, Microservices, Unit Testing, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Smart Applications International Ltd **Contract · Total Duration 2 years & 3 months** **CBD division, Nairobi County, Kenya**

During my time at Smart Applications International Ltd, I have had the privilege of serving three roles, as highlighted below:

Junior Software Engineer **July 2025 – Apr 2026 · 9 months**

1. Contributed to the design and development of modern UI/UX workflows for the Smart Insure product by translating Figma designs into responsive and scalable Angular user interfaces, while building reusable Angular components to promote code reusability, improve maintainability, and accelerate future feature development/s.
2. Integrated Angular front-end modules with backend services via RESTful APIs to ensure reliable data handling and smooth system communication, while implementing RBAC by configuring user roles and permissions to restrict feature access, improving system security and enforcing proper user authorization.
3. Developed and presented user and system reports using a combination of Apache Superset and Angular by creating and managing PostgreSQL-based datasets, tables, and queries, and embedding interactive dashboards, charts, and visualizations into the front-end to support operational and management reporting needs.
4. Performed front-end testing and validation to ensure application stability and alignment with business requirements, while resolving UI bugs and implementing code improvements to enhance usability, ease maintainability, and improve overall system performance.
5. Supported application deployment processes using Docker to package and run the Smart Insure web application across multiple environments, ensuring consistent performance, simplified environment configuration, and reliable deployments across development, testing, and production setups.

Skills: UI/UX Implementation, Data Visualization, +8 skills

IT Consultant **March 2025 – June 2025 · 4 months**

1. Implemented internationalization (i18n) to support English, French, and Arabic Languages, ensuring the Smart Insure product delivers a consistent and accessible user experience across multiple regions.
2. Created both template-driven and reactive data input forms in Angular to capture user information, while structuring and styling the layouts using Bootstrap's Flexbox-based grid system to ensure a responsive and user-friendly interface.
3. Applied comprehensive form validation across the Smart Insure web application to ensure accurate data submission—covering input patterns (alphabetic/numeric), minimum and maximum length checks, and case formatting rules—while providing clear inline user feedback through contextual validation messages displayed beneath each input field.

Skills: Data Validation, Front-end Language Translation, +5 skills

Graduate Engineering Trainee **Feb 2024 - Feb 2025 · 1 yr 1 mo**

1. Completed a 8-month intensive training program focused on Angular fundamentals, best practices, and modern front-end development standards, building a strong foundation in scalable UI development and industry-aligned coding practices that improved readiness for real-world application development.
2. Transitioned into the Smart Insure team as a Junior Angular Front-End Developer, gaining hands-on experience in building scalable user interfaces using component-based architecture, implementing state management, and applying performance optimization techniques, while collaborating with cross-functional teams in an Agile environment to deliver system enhancements and support ongoing product development.

Skills: Agile Application Development, State Management, +9 skills
